2. Case Diary Entry (Para 4 - Fund Flow Reconstruction)

INVESTIGATION CASE DIARY ENTRY (Para 4 - Fund Flow Analysis):
Complaint registered regarding unauthorized fund drain totaling ■94,500.00 originating from complainant account ACC00012. Digital and network analytics trace the fund trail across 4 intermediate layering nodes terminating at suspected syndicate sink ACC00148.

Typology Classification: Digital Arrest Scam with Hawala & ATM Exit.
Chronological Reconstruction:
Hop 1 (ACC00012 ➔ ACC00142): Amount ■94,500.00 via UPI (PhonePe) [00:00:00 (Incident Trigger) elapsed]. Forensic link: Direct social engineering transfer under coercion of fake law enforcement arrest warrant.
Hop 2 (ACC00142 ➔ ACC00215): Amount ■91,200.00 via IMPS [+00:01:45 (Automated Layering) elapsed]. Forensic link: Zero balance retained; funds routed within 105 seconds to bypass automated fraud filters.
Hop 3 (ACC00215 ➔ ACC00310): Amount ■87,500.00 via UPI (Paytm) [+00:05:18 elapsed]. Forensic link: Cheque kiting buffer account; customer KYC forged under deceased individual identity.
Hop 4 (ACC00310 ➔ ACC00148): Amount ■84,000.00 via ATM Cash Withdrawal [+00:12:53 (Physical Exit) elapsed]. Forensic link: Physical cash-out executed; CCTV footage preservation required under Section 94 BNSS immediately.

Forensic Conclusion: Syndicate demonstrates coordinated pass-through layering with automated bot-like velocity. Requisition under Section 94 BNSS dispatched to nodal banks and telecom service providers.
